GENIUS BAR

學習急診站 · Study Clinic

Bring one thing you're stuck on. Leave with a study pack.

WORKSHOPS | No prior knowledge required! | Free · HKBU students

MEET YOUR GENIUS

Lucia Luo · Business School, HKBU

- Expertise:
- Turning course material into concept maps
- Building multimodal study aids — explainers, quizzes, simulations
- Solving business maths & data problems with AI

1

Turn Your Course Material into Something You Can Learn From

[date & time TBC]

Teachers hand you linear text. Your brain needs structure and doors. Bring a chapter, a formula or a problem set and turn it into a concept map, an explainer and a quiz you can actually revise from.

2

Business Maths with AI: Solve It Once, End to End

[date & time TBC]

Margins, break-even, NPV, regressions, survey data — business courses hide maths inside the prose. Build a working model once, with code or a spreadsheet, and own every step.

CONSULTATION (walk-in)

[times TBC]

Drop in after each workshop for one-to-one advice and to refine your own study pack. You may also book another time.
